Audio Format	L-PCM
Max. Cable Length	≤15m, AWG26 HDMI standard cable
Max. working current	0.4A/5VDC
Operating System Compatibility	Windows, Android and MAC
Dimensions	64x28x13mm
Weight	22g

Application diagram:

Connection instructions:

- Insert the video capture card into an available USB port on your PC or laptop and wait for the default device driver "USB Video" to be installed.
- Connect a good quality HDMI cable between your source device and the HDMI video capture card, the max cable length is 15 meters.
- Open your chosen piece of acquisition software and select "add a new Source device".
- From the list of available options select "Video Capture Device" or "USB Video".
- You should now be able to review and record the video and audio signals entering the capture card from your source device.
- Please refer to the user instructions for your chosen acquisition software if you cannot carry out the above setup procedure correctly.
- **NOTE:** The minimum specification requirements for your PC or notebook are as follows:
CPU: PC - i5-3400 or above, Notebook - i7-3537U 2.0GHZ or above
Graphics card: PC - NVIDIA GT630 or above, Notebook - NVIDIA GT735M or above
System memory: 4GB RAM

Warning:

- For reasons of electrical safety this device must never be immersed in water, exposed to damp conditions or excessive force.
- Please do not use this device if you find that it is damaged in any way.
- Do not attempt to repair this device or take apart under any circumstances, as this will invalidate your warranty.
