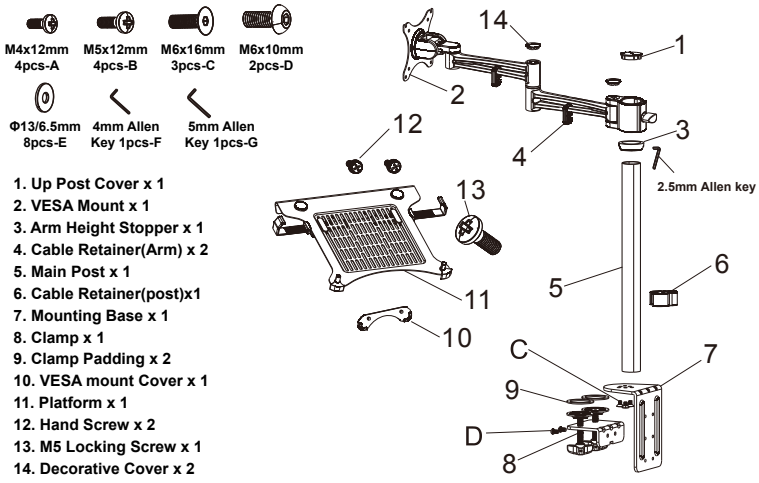
Caution:
Please read this manual thoroughly to avoid damage to property or personnel. If unsure of any part of this manual please refer to professional installer for help:

- This product contains small components that could pose a choking hazard if swallowed, please keep out of reach of children.
- This product is designed for mounting desktop or on edge of flat surfaces. Always ensure the mounting surface will be capable of withstanding the combined weight of the platform and device/monitor, reinforcement may be required.
- Safety gear such as gloves and safety goggles must be worn during the installation. A minimum of two people are required throughout the installation, failure to do so may result in injury or damage.
- This product is design for indoor use only. The bracket must be inspected at least every two months for loose joints or aged parts.

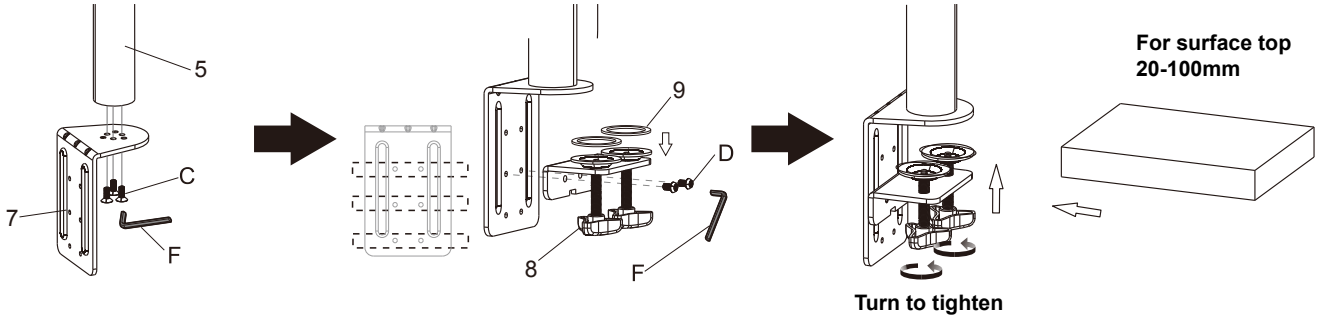
Contents:
Please check all contents listed below are included inside the box. If anything is missing please return to the retailer or dealer.



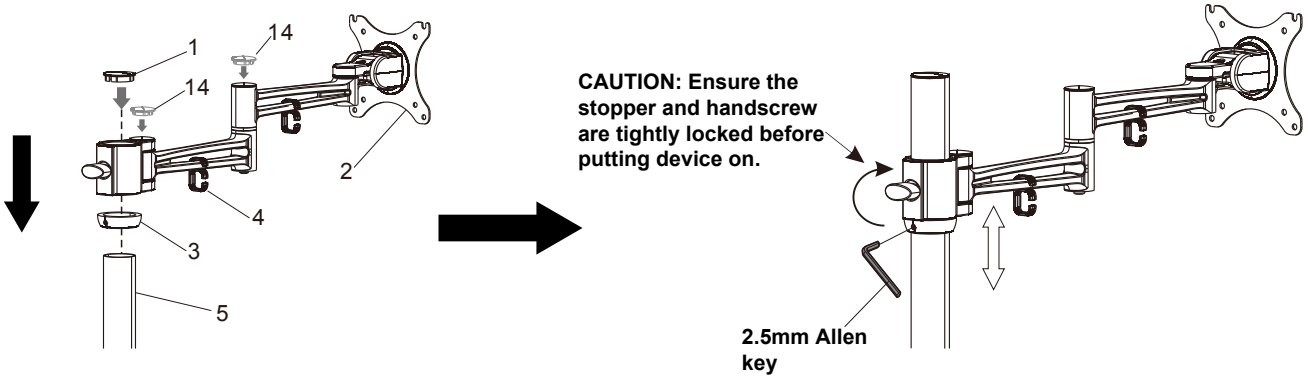
For this installation you will also require a flat and a Philips (cross) screw driver.

Step 1 – Mount base assembly:

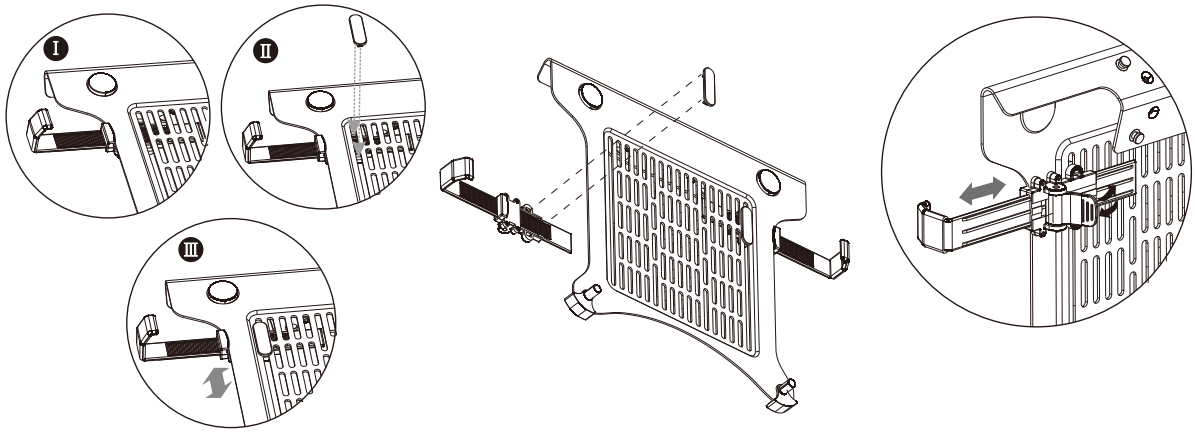
- Attach mounting base to the up post.
- Choose appropriate clamp clearance and attach hand screw bracket to the base.
- Slide and fasten the platform to the surface top.



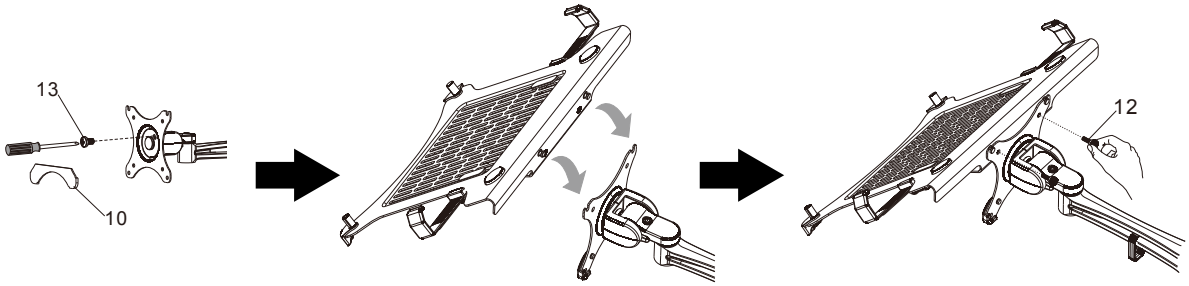
Step 2 – Slide the stopper and support arm on to the up post, tighten the stopper and extension arm at the desired height. Put the decorative end cap onto the up post and arm joint.



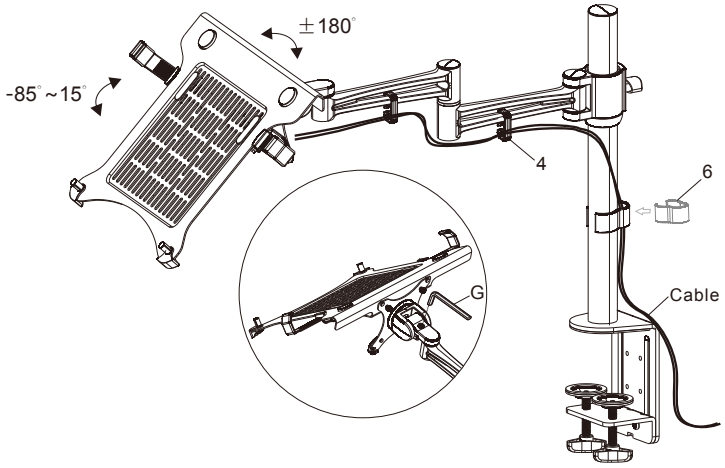
Step 3 – assemble secure arm on to the platform as shown below, arm can be slide up/down and retract to accompany devices of various sizes.



Step 4 – screw the locking screw to ensure the VESA mount does not rotate. Hang the platform on to the VESA mount and use the supplied hand screws to lock the platform in place.



Step 5 – adjust the pan and tilt position, perform cable management using supplied cable clips.



Errors and omissions excepted.
