

Passive Subwoofers

Passive subwoofers are unpowered bass cabinets that require external amplification.

The CASA series suits small to medium venues and mobile setups, while the CUBA series is designed for larger venues and professional sound reinforcement.

Application Scenarios	Compact dual-8" sub delivering tight, controlled low-end for mobile PA, small venues, or discreet installs where space and punch both matter.	Lightweight and compact, these passive subs are perfect for small to medium PA systems needing punchy bass. Easy to transport and pair with CASA full-range cabinets or other active setups.				CUBA-series subwoofers provide high-power, punchy low-end for venues and events, built tough with easy handling and flexible setup for performance.
