

Wooden Full-Range Passive PA Cabinets

Passive PA cabinets are unpowered loudspeakers that require an external amplifier. They're ideal for installations, mobile sound systems, and setups where amp racks or external processing are preferred. Offering flexibility, reliability.

Our wooden full-range passive PA cabinets offer powerful, natural sound and durable construction, including compact CUBA-6, versatile CUBA full-range models, installation-focused CS Series, and high-power CORVA cabinets.

Application Scenarios	Ideal for installations, stage monitoring, or mobile PA use, the CUBA full-range cabinets deliver strong, balanced sound in a durable wooden enclosure. Available in standard finishes, with models 178.739UK and 178.741UK offered in white, they support flown, pole-mounted, or wedge configurations for professional audio environments.					Designed for fixed installations requiring clear, balanced sound for music and speech. Ideal for venues, conference rooms, and commercial spaces where discreet, reliable audio is needed.		Built for pro installs and live events, the CORVA passive series delivers high-output, full-range sound with clarity and control. Ideal for stacked, flown, or pole-mounted setups in demanding performance environments.
