<b>Application Scenarios</b>	Designed for live stage use, conference venues, or multi-instrument setups demanding six mic inputs, DSP effects, and pro-level stereo output.	Perfect for small bands, church setups, or rehearsal spaces needing multiple mic inputs, stereo playback, and flexible USB/Bluetooth audio integration.	Ideal for solo performers, podcasters, or small acoustic sets requiring Bluetooth playback, USB recording, and simple DSP-enhanced vocal processing.	Versatile mixer for live performance, studio recording, podcasting, and laptop DJ setups, supporting microphones, instruments, Bluetooth, and USB playback.	Ideal for combining multiple instruments, keyboards, or audio sources into one output for home studios, live rigs, or AV setups.	Perfect for small presentations, karaoke, or portable vocal setups needing simple multi-mic mixing with battery or DC power options.
