Trouble Shooting

Trouble	Possible Reason/Solution
The digital piano will slightly puff when it is switched on.	Don't worry. This is normal.
Pressing a key makes no sound, after the power is on.	Please check whether the master volume is set properly, or whether the headphone jack is plugged in, which will automatically cut off the built-in speaker system.
When using the sustain pedal, some sound sustains longer, some sustains shorter.	This is normal. The tenuto of different sounds has been set to their optimized length.
The volume is too low.	Please check whether the master volume is set properly.
The speaker makes noise when a cell phone is nearby.	The cell phone will interfere when it is nearby. Please keep the cell phone away from the keyboard to avoid the jam.
The pitch doesn't match with the key while playing.	Turning off Split function, resetting Transpose/Octave to zero, or resetting A4 Tuning will solve the problem.
The demo song distorts or interrupts.	Maybe it has been playing in maximum power for a long time so that the circuit board self-protection system is activated in case of overheat. Turning down the volume or powering off the keyboard for a while will solve the problem.
There are two sounds at the same time while playing.	Maybe the Dual Voice function is turned on. Turning off Dual Voice will solve the problem.
Key touch is different from before.	This keyboard has 5 touch response levels. Maybe you have chosen different levels. You can adjust the touch response again.
The pitch doesn't change when Split function is turned on.	Please check whether the octave shift function is turned on.
The system crashed, and it still doesn't work after powering on again.	Please use a pin to poke the reset button on the back to reset the keyboard.

故障排除

故障	可能原因/解决方法
当开关电源时，伴随有噪音产生	这属于正常现象，请不必担心
当打开电源后，按下键盘不能发出任何声音	确认主音量控制钮是否设定在适当位置，或确认在耳机输出接口上是否连接有其它设备，因而导致内置扬声器系统自动断开
使用延音功能时，有的音色延音长，有的则延音短	这属于正常现象，是由于此琴不同音色的延音已被设定为最佳长度
音量过小	确认主音量控制钮是否设定在合适的位置
当使用移动电话或移动电话靠近时，琴的喇叭会有噪音现象	移动电话会带来干扰。为了避免这种噪声，可以关闭移动电话或是远离本琴使用
当演奏时键盘发出的音高与键盘位置不相符	可能是您打开了双键盘或者移调功能，此时关掉双键盘或者移调复位为零即可
播放示范曲声音失真或断续	可能是大功率播放时间过长而造成过热，电路自我保护系统启动引起的原因，此时调小音量或者关闭电源一段时间即可恢复
演奏时有两个音色同时发声	可能是您打开了双音色功能，此时关掉双音色功能即可
演奏力度与以前不一样	本琴有五种力度：轻、次轻、正常、次重、重；可能您选择了不同的力度功能所致，此时可按照您的需要重新选择力度或者复位
双键盘开启后无反应	请检查八度移调功能是否开启
当产品遇到死机时	请使用回形针按住产品背面的复位键进行复位
