WARNING!-IMPORTANT SAFETY INSTRUCTIONS BEFORE CONNECTING, READ INSTRUCTIONS

WARNING: To reduce the risk of fire or electric shock, do not expose this appliance to rain or moisture.

CAUTION: To reduce the risk of fire or electric shock, do not remove screws. No user-serviceable parts inside. Refer servicing to qualified service personnel.

CAUTION: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The lightning symbol within a triangle means "electrical caution!" It indicates the presence of information about operating voltage and potential risks of electrical shock.

The exclamation point within a triangle means "caution!" Please read the information next to all caution signs.

1. Use only the supplied power supply or power cord. If you are not sure of the type of power available, consult your dealer or local power company.
2. Do not place near heat sources, such as radiators, heat registers, or appliances which produce heat.
3. Guard against objects or liquids entering the enclosure.
4. Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks. Refer all servicing to qualified service personnel.
5. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as when the power supply cord or plug is damaged, liquid has been does not operate normally or has been dropped.
6. The power supply cord should be unplugged when the unit is to be unused for long periods of time.
7. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles and at the point where they exit from the apparatus.
8. Prolonged listening at high volume levels may cause irreparable hearing loss and/or damage. Always be sure to practice "safe listening".

Follow all instructions and heed all warnings
KEEP THESE INSTRUCTIONS!

Overview

The NUX KOMP CORE DELUXE MKII is an analog circuit compressor. Whether you're a guitarist, bassist, or any other musician. It offers the perfect amount of compression to the sound while maintaining the clarity and transparency.

Equipped with five knobs—VOLUME, SUSTAIN, CLIP, BLEND, and TONE—along with a toggle switch for ATTACK, this pedal provides precise and detailed control over your signal, making it highly versatile and adaptable to various playing styles.

	VOLUME knob Adjust the output volume of the signal and compensate for any gain loss.
	SUSTAIN knob Adjust the sustain and compression levels. This will limit and “squash” your signal when you play hard, making the tone tighter and smoother. As the signal decays, it increases the volume to extend sustain.
	CLIP knob Adjust the amount of signal going to the compressor. This knob helps reduce any distortions that may arise from the input signal.
	BLEND knob Adjust the blend of the dry and compressed signals. Turn it fully left for a clean tone or fully right for maximum compression.
	TONE knob Adjust the treble frequencies to control the brightness of the tone.
	ATTACK toggle switch The unique ATTACK switch lets you toggle between two ATTACK/RELEASE settings. In the up position, the compressor has a longer compression time, ideal for higher output instruments with active or humbucking pickups. In the down position, it's better suited for lower output single-coil pickups.
	Footswitch & FS indicator Press the footswitch to engage/disengage the effect. The FS indicator will show “RED” when the effect is engaged, and turns off when disengaged.

	DC jack Connect a DC 9V negative tip adaptor.
	IN jack Connect the guitar using a 1/4” TS plug to the input jack.
	OUT jack Connect the output signal to your amp using a 1/4” TS plug at the output jack.

Connections

Connect a 9V adapter (negative tip).
Then, connect your guitar to the input of the KOMP CORE DELUXE MKII and the output to your guitar amplifier.

Features

- 100% analog circuit
- True bypass
- Compressor designed for electric guitar and bass
- Low power consumption
- Blend knob for mixing dry and compressed signals
- Clip knob for input gain control

Specifications

- Power: 9V DC (Negative tip, Optional ACD-006A adapter)
- Current Draw: 10mA
- Dimensions: 122mm(L) x 72mm(W) x 47mm(H)
- Weight: 270g

*Specification may change without notice.

Accessories

- Owner's manual
- NUX sticker

WARNING

To reduce the risk of fire or electric shock, do not expose this appliance to rain or moisture.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. **Note:** This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.

The device can be used in portable exposure condition without restriction.
