

## Installation Guide - In-wall Amplifiers with Ceiling Speakers

- Each mains lead supplied is fitted with a UK BS1363 plug top, but may be removed for direct bare wire connection to mains if preferred (as shown on Amplifier 1).
- Each speaker output shown above is connected to 2 x 8Ω speakers but can also just be connected to a single 8Ω or 4Ω speaker if preferred.
- Optional 3.5mm stereo wall plate shown above for line input such as CD player, laptop computer or TV box etc.
- Bluetooth switched off on Amplifier 2 to receive the same Bluetooth signal as Amplifier 1 (via Aux input).
- Bluetooth, AUX input and optical input on Amplifier 1 are all active simultaneously – choose the input by playing only one of these into the amp.
- Further amplifiers can be added in the same way from the AUX output of Amplifier 2.
